

## CoolCram Demo For (70-270) Install, Config & Admin Windows XP Professional

**You are the administrator for your company. You have just installed Windows XP Professional on a portable computer for a user named Andrew. The computer is configured to have a modem and Ethernet PC card.**

**At the office, Andrew uses his computer in a docking station. At home, he uses his computer in an undocked state by using the power adapter.**

**Andrew travels to customer locations frequently. While travelling, he creates and edits documents. When he returns from a customer location, he information you that the battery power in his computer has not lasted as long as he would like.**

**You need to configure Andrew's portable computer to conserve battery power for his sales trips. What should you do?**

- A. Modify the Device Manager settings to disable all devices used by the docked hardware profile
- B. Restart the computer in the undocked profile. In control panel, disable the server service in the services options
- C. Configure the hardware profiles so that the Undocked hardware profile is at the top of the list of available hardware profiles.
- D. Create a new hardware profile named Remote. Use Device Manager to disable the modem and Ethernet PC card devices for this hardware profile.

**Answer: D**

**You are the desktop administrator for the Graphic Design Institute. You have just deployed new Windows XP Professional computers to all graphic designers. Each computer has a built-in tape drive for data backups.**

**The graphic designers need to back up their own data to the tape drive. You add all graphic designers' user accounts administrator members of the Backup Operators group on their computers. Then you instruct the graphic designers to create a full backup of all their data every Monday morning.**

**The graphic designers need to back up all of their data once a week. They also need to back up all the changes since the last full backup. The graphic designers want to use a backup method that allows them to recover their data as quickly as possible.**

**What should you advise the graphic designers to do?**

- A. Perform a Differential backup every Monday. Create an Incremental backup for Tuesday, Wednesday, Thursday, and Friday.
- B. Perform a Daily backup every Monday. Create an Incremental backup for Tuesday, Wednesday, Thursday, and Friday.
- C. Perform a normal backup every Monday. Create an Incremental backup for Tuesday, Wednesday, Thursday, and Friday.
- D. Perform a copy backup every Monday. Create an Incremental backup for Tuesday,

Wednesday, Thursday, and Friday.

**Answer: C**

**You are the desktop administrator for your company. All users have Windows XP Professional or Windows 2000 Professional computers. Users in the accounting department run an application that requires several hours to process financial and accounting data.**

**Users in the accounting department report that when they run this application, the performance of other business applications becomes significantly slower.**

**You need to allow the accounting application to run with the least amount of performance impact on the other business applications. How should you configure the users' applications?**

- A. Configure all other business applications to have High priority.
- B. Configure all other business applications to have Realtime priority.
- C. Configure the accounting application to have AboveNormal priority.
- D. Configure all accounting application to have BelowNormal priority.

**Answer: D.**
