

CoolCram Demo For (N10-002) Network+

1. Which two communications dial-up protocols does Windows 2000 Server natively support?

- A. PPP
- B. SLIP
- C. TCP/IP
- D. IPX/SPX
- E. NETBIOS

Answer: A, B

2. You are asked to implement a solution that provides for security authentication and encryption to a private network for a client machine. The client machine needs to connect to a NetWare server inside the private network. Which two protocols should implement to provide this functionality? (Choose two.)

- A. SMTP
- B. TFTP
- C. PPTP
- D. SNMP
- E. TCP/IP

Answer: C, E

3. Given:

- A user has a 24-port switch.
- The user wants to use 12 ports for an IP-based network and 12 ports for an IPX-based network.

These two networks will not talk to each other.

What should the user implement on the switch?

- A. SNMP
- B. VLANs
- C. routing
- D. an RMON probe

Answer: B

4. Given:

- Network A is IP network 192.168.1.0/24
- Network B is IP network 192.168.2.0/24

- One router connects network A to network B correctly, using IP only
- Both networks use many types of machines, including Windows NT machines, Linux machines, and NetWare servers.

Every computer needs to be able to see every other computer using host names.

Which two protocols should you install? (Choose two.)

- A. DNS
- B. WINS
- C. SNMP
- D. TCP/IP
- E. IPX/SPX

Answer: A, D
